1 Introduction

This document is the migration plan for the May 2024 PoAC release. The PoAC Change Management Board has decided on the content of the release.

The PoAC release contains Peppol BIS3 specifications and artefacts.

It does not contain PINT specifications and artefacts. These will be published a week later.

2 Details of migration

This section describes how and when the release content will be available for use. This release is defined as a minor release.

Publication

The date is set to **27-05-2024**. As of this date the release content is published. Stakeholders can start with implementing the changes.

Implementation time

The CMB has decided to give a time of three months to implement the changes. During this period the current version, November release 2023, is still the only version to be used.

Mandatory use

The date for the release content to become mandatory is set to **26-08-2024**

As of this date the old version, November release 2023, is not allowed to be used anymore. Only the new version, May release 2024.

Table 1. Migration overview

	Publication	Mandatory use
May release 2024	27-05-2024	26-08-2024

3 Migration rules

For the May release 2024 release it has been decided that the whole Peppol network has to start using the new artefacts as of 26-08-2024. They may not be used before this date.

The current version, November release 2023, must be used until 25-08-2024.

This rule is necessary in order to maintain interoperability.
